

Moon Landings - Dossiê

- Meu vídeo anterior sobre “Teorias da Conspiração”:

- Como algo de tamanha proporção pode permanecer em segredo:

Hidden Airbases factories in wartimes: <http://twistedifter.com/2012/01/camouflage-cali-hiding-air-bases-factories-plants-netting-wwii/>

- De 6 (1995), 20 (2001) a 30% dos norte-americanos não acreditam que o homem foi à Lua (1 em 5 à quase 1 em 3);

- Cerca de 30% dos russos também não (e 25 dos brits): https://en.wikipedia.org/wiki/Moon_landing_conspiracy_theories

- Até hoje, 2016, você pode ver gente postando videos com novos indícios de que o homem não foi à Lua:

- A inaptidão ou má vontade da NASA com relação ao assunto:

a) A história de que as fitas originais (cerca de 200.000) foram perdidas e depois apagadas por engano. A restauração que foi feita a partir de cópias espalhadas pelo mundo;

- Como não apenas a NASA, mas também muitas pessoas pró-versão oficial, como o CEU e o Mythbusters acabam acidentalmente dando razão para as pessoas que questionam a ida do homem à Lua:

a) Thomas Ronald Baron (security inspector who wrote a 500 page report on why the program was not going well with the Apolo program), who died along with his wife in a railroad accident (by a train) soon after he testified in congress. Some believe he was killed. The complete control of the program by the military represented by General Sam Phillips:

b) Telescopic cameras, or why Nasa didn't took one there.

c) Files that are not classified (of the Apolo program) and yet are not available for the public;

d) Raditation and temperature;

e) Bill Wood (rocket scientist);

f) S.Kubrik;

g) All is a mass propaganda machine;

h) the large film studios owned by the military industrial complex (in particular San Bernardino);

g) Gus Grissom (astronaut – burned to death. Had doubts about the program. According to wife, had written reports about the program that were confiscated by the FBI on the day of his death that were never returned)

- Ralph Rene (1933-2008) interview: <https://www.youtube.com/watch?v=bzgaSN3MnmA>

a) He is an inventor (2 patents for mechanical tools) and former member of MensaIQ (the high IQ society)

b) Published "NASA Mooned America (1992)". Definitely an honest man, he is the one that started most of the questions that scientists refer too (meaning, he is also indirectly responsible for some of the bad science we see in the Moon Landing Hoax movement).

c) He received a letter asking him to contribute with ideas to NASA regarding following missions (i.e. Mars). He was outraged that he was listed as a contributor in a government magazine, but none of his ideas were there;

d) Dr. Ravell and the Russian program;

- De onde vem a ideia de que Stanley Kubrik ajudou no projeto Apollo.

a) A ideia inicial de que S.Kubrik fora contratado apenas como consultor de um script para filmes hipotéticos de como seriam as 3 primeiras missões à Lua;

b) A coincidência: a instrução de Kubrik de que o filme "Eyes Wide Shut" estreasse no dia 16 de julho de 1999, data em que se comemorava 30 anos do lançamento da Apollo 11 (e o infeliz fato de que Kubrik morreu antes dessa data);

c) o Mockumentaire "Dark Side of the Moon", em que o diretor conseguiu "entrevistar" os principais conselheiros do presidente norte-americano da época. O filme "propõe" que Kubrik foi contratado para filmar a "farsa da ida do homem à Lua", e que depois ele teria pedido a câmera usada. Alem das piadas mais óbvias, há piadas internas, como o fato de que o filme 2001 – Uma Odisseia no Espaço (1968), de S.Kubrik, não contém imagens parecidas com as que vemos no programa Apollo: <https://www.youtube.com/watch?v=90zneJONh0w>

Collins vs Farrah:

- Filmmaker says it was impossible to fake the Moon Landing (2012. More than 2 million views after promotion from big media!):

- Jarrah challenges the video with very good arguments (way less views):

<https://www.youtube.com/watch?v=-3zhZqiSe5c>

- Collins answers Jarrah, agreeing that, although unlikely, it was indeed possible to fake the Moon Landings:

- Jarrah addresses some points raised by Collins:

- History of the conspiracy Claims by the Smithsonian (2009):

<http://www.smithsonianconference.org/apollo/wp-content/uploads/2009/10/Denying-the-Apollo-Moon-Landings.pdf>

- a) "A deliberate effort to mask problems at home";
- b) William Brian – Extraterrestrial technology assisting the program;
- c) Richard Hoagland – Apollo program found Alien structures on the Moon;
- d) Ted Goertzel, a professor of sociology at Rutgers University who has studied conspiracy theorists, said — "there's a similar kind of logic behind all of these groups, I think. For the most part, he explained, —**They don't undertake to prove that their view is true|| so much as to —find flaws in what the other side is saying.** And so, he said, argument is a matter of accumulation instead of persuasion. —They feel if they've got more facts than the other side, that proves they're right".
- e) "Moon landing deniers attack the physical evidence of the Moon rocks returned by the Apollo astronauts as either faked by NASA or collected in Antarctica prior to the missions. Those who claim that the rocks were faked by NASA early emerged but have been displaced by a more sophisticated but still far-fetched denial. For instance, **some recent landing deniers claim that when NASA's Marshall Space Flight Center director, Wernher von Braun, visited Antarctica in 1967 it was so he could explore the possibility of using meteorites from the Moon collected in the ice as standins for the rocks claimed to have been from the Apollo landings.**"
"The one overriding problem with this theory is that the first lunar meteorite discovered in Antarctica was collected in 1979, a decade after the first Moon landing, and scientists did not realize its lunar origin until 1982."

- The Stars:

<https://www.hq.nasa.gov/alsj/alsj-AOTNavStarsDetents.html>

- **James Oberg** and the payd attempts by NASA and other agencies to address the conspiracist claims:

"In 2002, NASA granted US\$15,000 to **James Oberg** for a commission to write a point-by-point rebuttal of the hoax claims. However, NASA cancelled the commission later that year, after complaints that the book would dignify the accusations."^[160]

Oberg said that he meant to finish the book.^{[160][167]} In November 2002, **Peter Jennings** said "NASA is going to spend a few thousand dollars trying to prove to some people that the United States did indeed land men on the Moon," and "NASA had been so rattled, [they] hired [somebody] to write a book refuting the conspiracy theorists." **Oberg says that belief in the hoax theories is not the fault of the conspiracists, but rather that of teachers and people (including NASA) who should provide information to the public.**"

"In 2004, Martin Hendry and Ken Skeldon of the **University of Glasgow** were awarded a grant by the **UK-based Particle Physics and Astronomy Research Council** to investigate Moon landing conspiracy theories.^[168] In November 2004, they gave a lecture at the **Glasgow Science Centre** where the top ten claims by conspiracists were individually addressed and refuted."

"**James Oberg** of ABC News said that the conspiracy theory is taught in Cuban schools and wherever Cuban teachers are sent.^{[160][213]} A poll conducted in the 1970s by the **United States Information Agency** in several countries in **Latin America, Asia,** and **Africa** found that most respondents were unaware of the Moon landings, many of the others dismissed them as **propaganda** or **science fiction**, and many thought that it had been the **Russians** that landed on the Moon."

Interesting Conclusion taken from conversations with Youtube users:

Moon Landing

There are actually **two** interesting points to consider about this (f)act:

- If the Moon Landing was **true**: It requires several sophisticated explanations to prove it;

- If the Moon Landing was **false**: It would have been quite easy to fake it...
